# Laney Facilities & Technology Updates

Working Together to Support Our Students & The Campus Community

Lighting Project Update

The exterior lighting around campus is being repaired and enhanced. This, combined with new parking lot lights will make the entire campus much brighter at night.

Elevator Update

The Tower and E building elevator replacement project is back on track. Work will begin in late November.

Eagle Village is Moving 🦅

Eagle Village is set to move! In order to prepare for construction, a new Eagle Village will be installed where the tennis courts are currently located. The new Village will include new units for EV1 – EV6, bathrooms and the temporary locker spaces.

Updating Equipment Inventory

IT staff are working on updating equipment inventory and developing a new check-out form for issuing equipment.

Chromebook Lending Program

The Chromebook lending program continues. The next distribution date is 8/19.

Theater Modernization

The architects are busy meeting with stakeholders and working on schematic drawings for the theater modernization building. Not only will the project resolve some long-standing accessibility issues, it will provide some great new learning spaces and a re-imagined north entrance.

District Master IT Plan

District IT, along with CBT, are working on a District Master Technology Plan. The Laney Tech Plan and other details have been shared with them.

Tech Tuesdays

Topics for Fall Tech Tuesday training sessions are welcome. Excel trainings are being planned for staff.

FAC Meetings

Facilities Planning Committee meets the 1st and 3rd Monday of the month during the fall and spring semesters and meetings are open to everyone.
https://laney.edu/facilitiesplanningcommittee/

IT Resources

Links to resources needed for remote learning/teaching/business functions will be provided on the Laney IT webpage (https://laney.edu/laney-it-group/) in the coming days.

Leak Remediation Project

The water testing for the Phase III Leak Remediation project is complete. This project includes roof, plumbing and mechanical leaks as well as exterior membrane leaks. We expect the project to begin in the next month or so, with a variety of contractors working on repairs.

Adobe Creative Cloud

Adobe Creative Cloud. We have acquired licenses for students to use the software from home.

Remote Tech Support

Laney IT Continues to provide remote tech support. We have acquired technician software called **Teamviewer** to effectively provide remote support to end users.

Turnitin License

We renewed this for faculty use for next year. If you need assistance to use the program with Canvas, please contact Laney help desk.

Work Orders

Work requests can be submitted by emailing the Laney Business Office at lbusinessoffice@peralta.edu or texting 510-599-9411.
